1)

```java
package scanner;
import java.util.Scanner;
public class Exercitiu_1 {
public static void main(String args []) {
    Scanner hello=new Scanner (System.in);
    int n=hello.nextInt();
    int i=2;
    do {
        System.out.print(i + " ");
        i+=2;
    }while (i<=n);
hello.close();
}
}
```

2)

```java
package scanner;
import java.util.Scanner;
public class Exercitiu_2 {
public static void main(String args []) {
    Scanner hello=new Scanner (System.in);
    int n=hello.nextInt();
    int sum=0;
    int i=1;
    do {
        int h=(int)Math.pow(i, 2.0);
        i++;
        sum=sum+h;
    }while(i<=n);
    System.out.println(sum);
    hello.close();
}
}
```

3)

```java
package scanner;
public class Exercitiu_3 {
public static void main(String args []) {
int i=1;
do {
    int b=1;
    do {
        System.out.printf("%5d",b);
        b++;}while (b<=i);
    System.out.println();
    i++;
    }while (i<=5);

}
}
```
